InnoBright's "Altus" denoiser software saves millions of dollars in rendering costs for animation studios, commercial visual effects studios, gaming companies, CAD/CAM, scientific visualization and architectural/engineering firms. This patent protected filtering algorithm plugs into existing Monte Carlo rendering systems, allowing customers to render less and produce high quality output. www.innobright.com

LoboLoxe has a method and is working on a device to allow users to temporarily color hair or imprint a design on their hair. The process uses heat and the diffraction of light so that when viewed from a certain angle the color or design appears.

New Mexico MEP is a statewide assistance center dedicated to increasing the competitiveness of the state's small and mid sized businesses. As a public/private partnership, New Mexico MEP brings together government, not-for-profit and industry resources to offer the comprehensive programs and services needed. www.newmexicomep.org

OptiPulse has invented a technology that is changing communications by introducing a paradigm shift in information bandwidth. OptiPulse's 5G wireless infrastructure will enable 5G much sooner than thought by linking hubs with a "photonic bridge" using OptiPulse's multidimensional multiplexing wireless links at over 100 Gbps by interlaced invisible beams. www.optipulse.com

SolaranRx is an emerging growth company developing a new class of therapies and companion imaging agents to treat metastatic melanoma. SolaranRx precisely targets deadly melanoma tumors with a radiolabeled peptide, offering unique therapeutic potential with minimal side effects. www.solaranrx.com

SportXast is an app that crowdsources sports highlights, making it easy to keep the most ardent fans up-to-date with real-time game highlights. Fans create and join an event to capture and share game highlights. The product's magic button captures the previous 8 seconds of action when tapped, making it routine to catch the goals, touchdowns and home runs. www.sportxast.com

Trusted & Secure Systems (TruSecSys) provides an iron-clad, hardware-based, security and trust foundation for modern electronic systems. The company's hardware-oriented security and trust (HOST) foundation is based on security and trust primitives (STPs) which provide each component of the microelectronic system with a unique DNA-like identity that is very low cost and unclonable. www.trusecsys.com

Wedge Communications' mission is to bring to market web-based and mobile technology that help individuals enhance wellness and prevent chronic disease by improving their lifestyle behaviors. www.wedgecommunication.com

Zocere, Inc. is a New Mexico-based biotech company that is developing novel therapeutics for neurological diseases, including stroke and offering services to other entities developing stroke related diagnostics and treatments. www.zocere.com
